

```
do {  
    statements;  
} while ( condition );
```

The diagram illustrates the execution flow of a do-while loop. The word **true** is positioned to the right of the loop, with a horizontal arrow pointing left to the semicolon at the end of the `while` clause, and a vertical line extending upwards to the `do` block, forming a loop back. The word **false** is positioned below the `while` clause, with a downward-pointing arrow indicating the exit from the loop.
